

Student Name: **Patrick L. Casey**
Course Number: **EDUC 992**
Title: **Derricks to Desks**
Instructor: **Greg Mudge**

Course Title: **Welding**
Lesson Focus Area: ***Careers in the Oil Industry***

Introduction:

Discuss with the students the importance of selecting a career goal and striving to prepare for that goal through course preparation and job experiences.

Presentation:

Discuss the opportunities for a variety of careers that are available in the oil industry. Use information from the WSPA presentations to build a clear picture of the current and future job situation in the oil industry. (Facts like, *the average age of all oil industry employees is 54 years*, will help to show opportunities for employment over the next 10 years.)

Application/Activity

Using the Internet, have the students do a job search of the oil industry. (Goggle is an excellent search engine to find this information) Select a career that is in the welding or construction areas and find the following information.

- Job Title
- Job Description/Working Conditions
- Training or Education needed for the job
- Income
- Future Opportunities

Create a written report that will include the information listed above. In the report, have the student explain why they selected their particular job area.

Closure

Highlight the information from the student reports in a graphic presentation to show the students the many job choices available in the oil industry.
